- 2) How our planet timeline was hijacked using secrecy and deception
- 3) Scientific measurements show that a certain number of minds affect the entire planet
- 4) Crystals used in the ancient past and future
- 5) Comparing corroborating information by Jenhan and Dr Marcel Vogel
- 6) Imagining a positive timeline on earth
- 7) Using a crystal to imprint a positive timeline into our planetary matrix
- 8) Concluding thoughts

1) Introduction to our power within us

Elena:

Power lies within us, it always did, the enemies of humanity hid from us the keys to this knowledge, today we are taking it back! I am Elena Danaan and together with Dan Willis we will show you the way to this power and how we can change this reality. Today we are going to create a positive timeline in the planetary matrix using a crystal. We will see how our planet's timeline has been hijacked using secrecy and deception, we will go over scientific measurements that show that a certain number of minds affect the entire planet, how crystals were

used in the ancient past and the future, we will compare and corroborate information from the stars and from earth, we will visualize a positive timeline on earth and use a crystal to imprint it into this planetary matrix.

Today to do this amazing work I have with me Dan Willis. Dan you are one of the disclosure project top secret military witnesses who testified at the National Press Club in Washington DC in 2001 in front of every major media, this world disclosure event was asking for congressional hearing in order to bring forth the witness scientists within the black projects who can release the technology derived from extraterrestrial reverse engineering that have been hidden from us over for over 60 years, you are also an ex-radio broadcast engineer and an ABC newsman, you took interest in how the mainstream media has withheld disclosure of the full message to the public and you also worked with Dr Marcel Vogel on the science of crystals.

2) How our planet timeline was hijacked using secrecy and deception

Dan:

On the planet earth there was group of individuals who plotted to rule the world to serve their own interests. They infiltrated the secret societies and used them for a cover for their plan. With their great control of financial wealth and their assets placed in high positions to move forward on their secret agenda, for what they called a "new world order", to have the entire world under their complete control, as part of their plan, they funded the Nazis of Germany into power.

Before the end of World War II, many Nazis had escaped with the help of the Vatican, and they had set up a secret base in Antarctica, where they had entered into an alliance with the Draco of the Ciakahrr Empire, which gave the Nazis highly advanced technology. This act was in direct violation of the established Prime Directive in our galaxy.

In Operation High Jump, when the US attempted to destroy the Nazi base, they were completely defeated with their advanced anti-gravitic craft with directed energy weapons. This is how they were able to intimidate the US government into a future surrender.

In order to move forward on their new world order agenda, the Nazis fully infiltrated into the US under Operation Paperclip through their assets placed within US intelligence. In order to keep these operations secret from the American people, who believed they won World War II, they placed their assets in high positions in intelligence, aerospace, pharmaceutical corporations, health agencies, education, entertainment, news media etc. to create a "matrix of perception" in order to hide this fact from the American people.

They had the history of World War II completely rewritten in order to hide the Nazi escape and infiltration from school children studying history in the future, as well as the Nazi's deep connection with the occult. They had all the major universities all over the world silence the truth about what they knew about the powers of human consciousness to affect reality.

President Eisenhower had a meeting with the Galactic Federation of Worlds which tried to warn him about the Nebu grey extraterrestrials from Orion and to not give consent to them by entering into a treaty. The Nazis had already placed their assets within the newly formed MJ-12 control group, who went behind Eisenhower's back and entered into a treaty with the Nebu.

The Nebu violated the treaty and moved forward to their future plan to fully control earth through their hybrid program abducting millions of humans on earth.

Since that time, a surrender was made during the Eisenhower administration to the Nebu and Draco and our legal constitutional government has been denied access ever since.

In the interest of balance, the Galactic Federation of Worlds has been working secretly with the US Navy to help protect earth by helping the Navy create a fleet of space craft for a program called "Solar Warden", and recruiting

personal for 20 years tour of duty in space on a separate timeline and then returning them back to their original timeline.

With high level individuals in our military and intelligence now being illegally denied access, an attempt in 2001 by many military and intelligence witnesses to disclose these operations to the people of earth was suppressed by their control of the news media.

Their most powerful asset to move forward and accomplish their agenda for a "new world order" was their almost complete control of information through the mainstream media outlets as well as social media on the internet. They kept our civilization from technologically progressing through citing national security concerns legally suppressing any technological breakthroughs that would threaten their control, thus keeping our planet technologically retarded while they secretly advanced by several decades of advancement.

They kept the public believing that primitive rockets were the only method to overcome gravity to go into space. They used the public's money and personnel in compartmentalized secret projects to fund and advance their secret space program, with operations in Antarctica, the Moon, Mars, Ceres and elsewhere in our solar system. Where they utilized captured humans for slave labor in all their operations in underground bases on earth and throughout our solar system.

Their new world order plan through their control of regulatory agencies, that were initially intended to protect the health and welfare of the public, was instead being used through various means to fulfill their plan to reduce the entire population of earth by 90%, where the remaining 10% would be controlled and enslaved to serve them.

Many whistleblowers and witnesses exposing their dark operations despite their secrecy and censorship, have contributed to a current global awakening exposing the truth of these crimes against humanity.

Once a certain critical mass awakening of the people of earth occurs, these criminals against humanity will be then brought to justice using the rule of law, which will lead to earth's liberation into a positive timeline without these dark criminal elements impeding earth's positive evolution into joining the galactic community.

Elena:

Since the early 1950's, the Galactic Federation of Worlds, has been secretly helping Humanity with cooperation programs sharing of technology, helping us building our defenses against the Nebu threat. As part of this cooperation, the Earth Alliance was created, allying Earth and extraterrestrial military forces to fight back the invader. This cooperation program gave birth to the Solar Warden fleet.

February 2021, Luna, Earth's moon, was liberated from the Nebu and Dark Fleet occupation, by the Earth Alliance and the Galactic federation of worlds.

April 05 2021: Raids start on Mars, performed by the GFW and the Martian Alliance.

May 14 2021: GFW decoded the frequency keys of the stargates used by the Nebu in our star system, and locking them.

June 6 2021: Liberation of Antarctica from the Dark Fleet.

July 5 2021: Final victory on Mars.

July 14-17 2021: Jupiter agreements.

Aug 28 2021: liberation of Ceres.

The Deep Underground Military Bases were progressively cleared, and the Nebu Grays finally cast out of this star system, as well as the Ciakahrrs.

Ref

3) Scientific measurements show that a certain number of minds affect the entire planet

Scientific experiments establishing the reality of the effect of a small group of people to affect this morphogenic collective field was documented in the "International Peace Project in the Middle East," published in the Journal of Conflict Resolution.

Researchers were able to identify the minimum number of people needed to experience inner peace before it's mirrored in the surrounding world. That number they determined is the square root of one percent of the population. This represents only the base number required for the effect to begin -- the more people participate, the more pronounced the outcome.

For example the square root of one percent of the entire population of earth, which is approximately 8 billion would be a little less than only 9,000 people to be required to affect the entire population of this planet. This has been proven in numerous repeated experiments to be a fact.

Further evidence of this collective field was indicated by Princeton University who setup a worldwide network of physical random number generators located all over the planet to measure the effects of consciousness on electronic devices and called it the "Global Consciousness Project". On the day of the 9-11 event, the equipment spiked a large signal showing there was a collective emotional response that could actually be measured by this field. Other large recordings have occurred on presidential inaugurations, tsunamis and the deaths of public figures. In other words, collectively together, we produce an effect which can be actually measured.

Imagine if this effect from the mind of each person could be amplified and multiplied using the science of crystals

4) Crystals used in the ancient past and future

Crystal Scrying

Elena:

Crystal scrying is a very old divination technic that consists in focusing your mind's eye in the center of a crystal ball that is usually quartz, although amethyst works as well but gives less reliable results. By focusing the mind'eye, or third eye, or pineal vision, into a quartz, we open a vortex through space-time that allows us to see images that can represent: a future time, a past time, or a deeper understanding of the present. It is our intention that will decide about the path we want our consciousness to project into. We can either do it for ourselves, global events, or for a person we link to energetically.

Dan:

The quartz crystal formed in the shape of a sphere embodies the ability to resonate with all geometries within the sphere and is therefore a universally resonant shape that is well suited for this purpose.

Crystal Shiva Lingam in India

Dan:

In Hindu Shiva temples they worship Lord Shiva in the form of a Crystal Lingam. The purest and most sought-after form of the Shiva Lingam is made from quartz crystal

Ref

Druids using Crystals

Elena:

The knowledge related to crystals has crossed the ages of Humanity throughout ancient Pagan spiritualities, such as Druidism. Gemstones are used by Druids for healing as well as to perform spells, as Druids believe that stones held keys to transform the fabric of reality. By placing certain megaliths on particular geomagnetic points

on the Earth, they were able to open portals onto other dimensions of consciousness, other realms of reality such as the 4th density (fairies, Agartha, sidhe...). Gemstones were used in addition to plant spirit medicine and astrological configurations.

Quartz crystals were used to gather energy from the Earth and the elements, often placed at the extremity of a staff or a wand. The energy gathered would then be moved along the wand, physically by the power of the mind, and the crystal acts as a transmuter that sends a ray of energy towards a target. The target can be in physical proximity or distant (quantum resonance=magic spell).

Native American Shamans using Crystals

Elena:

As a hereditary Shaman from the Saami & Norse traditions, I have used quartz crystals to help propel my consciousness more easily to parallel realms. The quartz acts as a “trampoline” for the consciousness, helping the shift into a faster frequency.

Dan:

A related story...

My older brother who studied the extensively the shamanistic practices of the native americans had a friend who was a 107 year old Hopi Indian chief, David Monongye, who was a keeper of the Fire Clan tablets and was the one appointed to reveal Hopi traditional wisdom and teachings, including the Hopi prophecies for the future to the general public in 1946 after the use of the first two nuclear weapons on Japan.

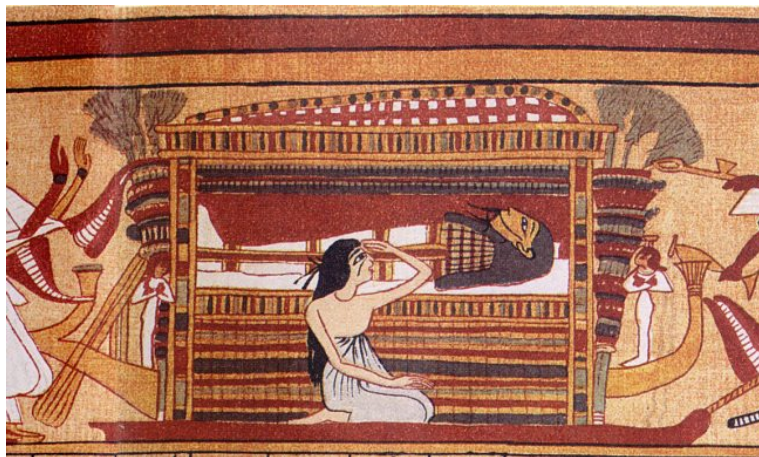

My older brother Willy Whitefeather

My brother and I made a trip to visit his Indian chief friend in the Hopi village of Oraibi. When we arrived at the

village to meet with his friend we brought gifts of sea shells, crystals and what the chief also wanted was a bucket of Kentucky Fried Chicken. After a few hours of him telling stories, one of the Indians said that someone had stolen his cow. The chief went to the tribe's medicine man who would use a quartz crystal in a way that he learned who stole the cow, he double checked with another shaman to confirm, and sure enough they found the thief and the cow.

The use of Crystals in Ancient Egypt

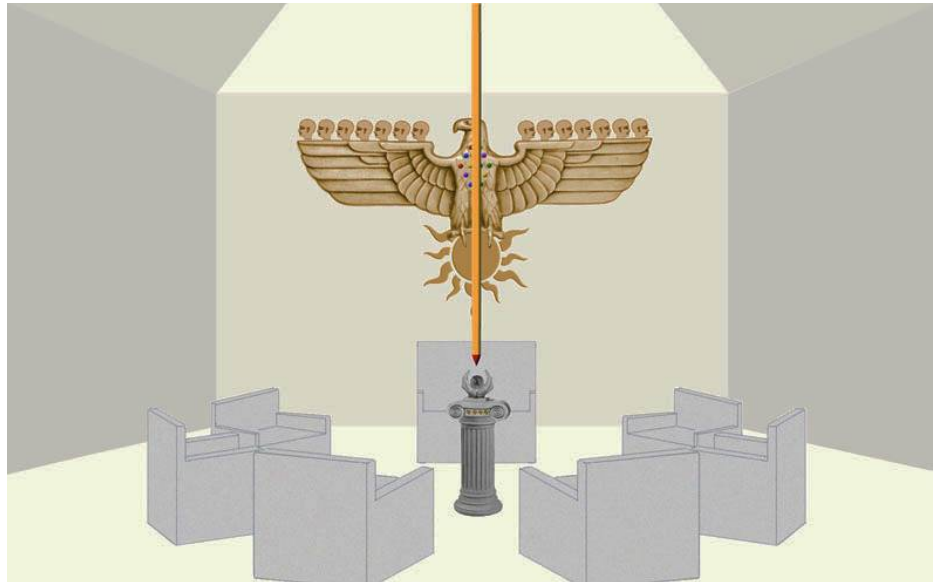

During the Old Kingdom period in Egypt, from 2686 B.C. to 2181 B.C, the statuary funeral art made use of quartz crystals inclusions for the eyes. Shaped as conical polished lenses, it was giving the statue a staggering presence, quasi hypnotic. The Ancient Egyptians from this period believed that quartz was a bridge between the world of the living and the realm of Afterlife, enabling the soul to connect to the receptacle when invoked: the statue representing the deceased.

Ancient Egyptians used quartz crystals in rituals and particularly when burying the dead. Pharaohs and priests used cylinders filled with quartz crystals to balance the Ba and Ka energies of the body. Some were buried with quartz crystals on their foreheads. This was meant to provide safe travel as they moved into the afterlife.

Crystal discovered in Atlantean Pyramid

Dan:

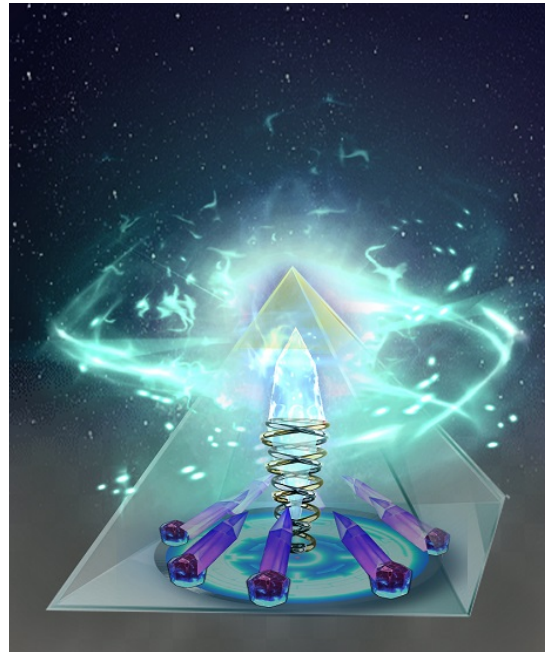

Dr. Ray Brown was scuba diving near the Bahamas had discovered a large crystalline pyramid and he described entering into a room in the pyramid that was fully illuminated from an unknown source. In the center of the room was a quartz crystal sphere with two hands holding it atop a pedestal. Surrounding the crystal in a circle were 7 chairs with one being higher than the other. From the pyramids ceiling above a golden rod tipped with a red crystal pointed at the crystal sphere.

Dr Marcel Vogel examined this quartz sphere Dr Brown retrieved and reported that he was amazed at the sphere emitting very powerful, very unique energies.

These seven chairs in a circle surrounding the quartz crystal sphere appears to be a method of interfacing the minds of 7 beings, with apparently one of them in the larger chair may have been leading the group as they projecting their consciousness into the crystal, which was apparently interfacing up through the golden rod and connecting into the massive pyramid structure. This technology was possibly interfacing whatever this groups intention was, possibly even changing the actual structure of reality.

It's significant to reflect upon the element of these minds all interfacing with this quartz crystal sphere and these advanced technologies in that pyramid room that incorporated a higher understanding of the geometry interface between mind and matter. A lost knowledge from our ancient past.

Ref Ref Ref Ref

Elena:

These devices I have been shown are at the same time both harvesters of universal life force and energy supply generators. It consists in: a pyramidal structure with a 52 degree angle, a central quartz crystal occupying 2/3 of the high of the pyramid, which is wrapped by two coils of different metals (1 golden + 1 silvery color) spiraling in 2 opposite directions. At ground level, around the crystal, are 6 other crystals of a different nature, commonly purple and smaller. They all point at the central crystal at an angle which is different than the angle of the walls of the pyramid. These 6 purple crystal send an impulse to the central quartz. Energy is gathered and sent to the top of the structure. It is gathered by the pyramidion that transforms this concentrated universal life force into energy supply, and send it either by physical connection (quite rare) or by quantum transfer (most common), to whatever device, engine, town, etc, that need energy supply.

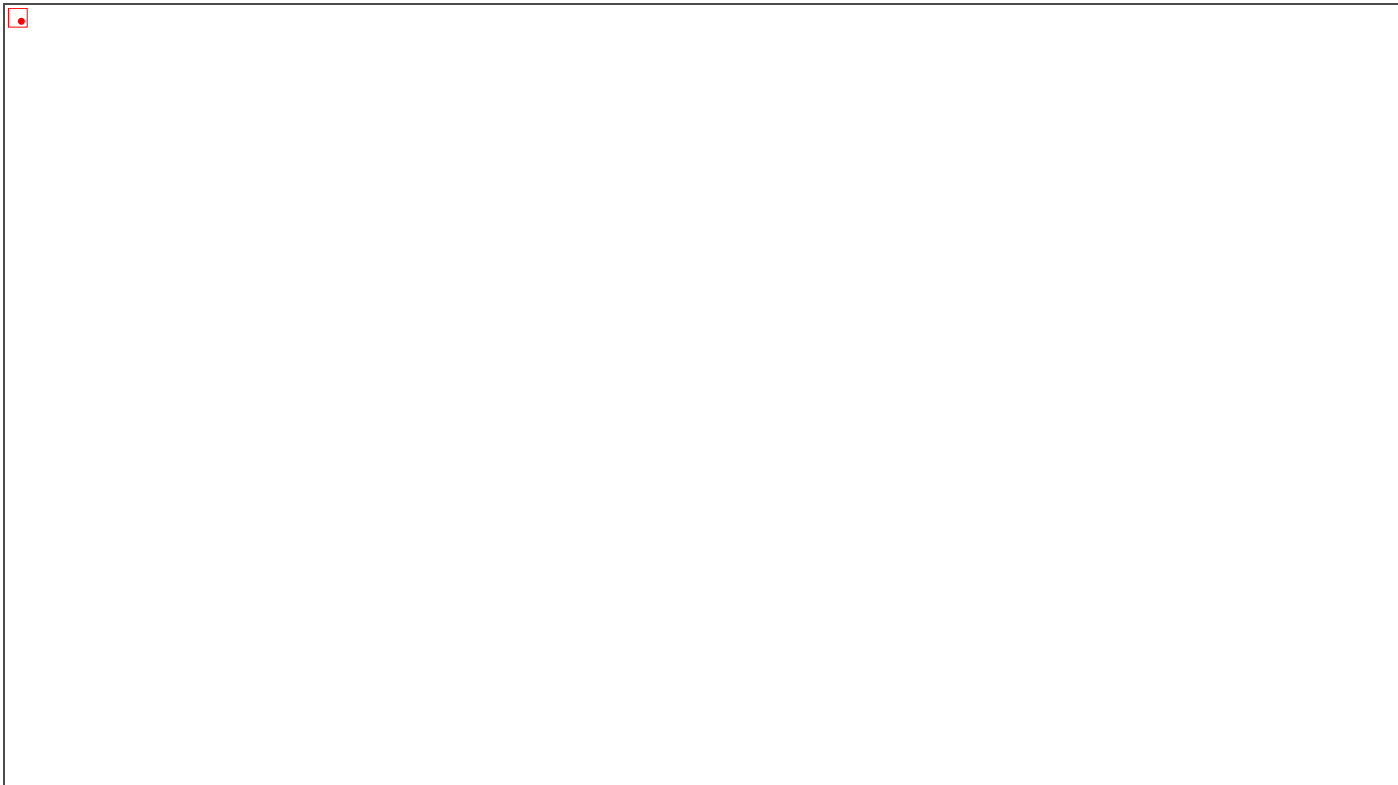

Crystal Skulls

Mitchell-Hedges Crystal Skull

Dan:

When Marcel Vogel was working with the Mitchell-Hedges crystal skull and the owner of the skull, Mrs Hedges, he focused his mind within the crystal skull on knowing the intention of the functioning of these skulls.

He saw a temple with a hole in the top. The skull sat on a pedestal directly under this hole. There was a priest robed in white, wearing a medallion of gold inscribed with the image of the sun and its rays. The priest waited for the light of the sun to strike the skull, illuminating it. An older person with a shaved head came into the temple. The priest put his left hand on the head of the elderly man and his right hand on the crystal skull. He drew his breath in and pulsed the breath. The information in the mind of the older man was now transferred to the skull. He left and in his place came a young girl also dressed in white. The priest reversed his hands, placed his left hand on the skull and his right hand on the head of the young girl. He drew his breath in and pulsed his breath. That knowledge that was contained in the skull was now in the mind of the young person.

Ref

Space Arks

These are currently being discovered in our solar system and are being activated

Elena:

I was very impressed, I would even say “dumbfounded” when I first was invited to visit one of the motherships of the Intergalactic Confederation. The interior walls were covered with crystals! Rhomboidal shapes as well as clusters. It was magnificent, breathtaking. An experience in a million life times. These beings are from different densities so this environment helps them coexist in a shared physicality all together. Indeed, as I was explained, crystals have this particularity that they are able to exist physically in several densities at the time.

5) Introduction of who is Jenhan and Dr Marcel Vogel

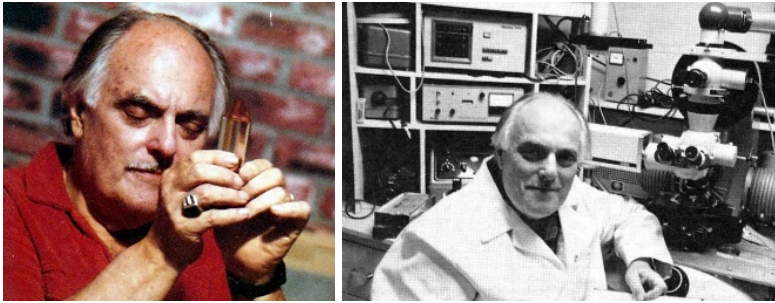

Jenhan:

Elena:

So talking about extraterrestrials, I know I have had the pleasure to meet Thor Han Eredyon's brother whose name is Jenhan, he's his younger brother. Thor Han is my contact in Galactic Federation of Worlds and these both persons are from the Pleiades from the planet Erra, it's a planet of the Taigeta system that they call Ashara and Jenhan, Thor Han's younger brother is an incredible person, he lives there still and he is studying how to become a terra former, they don't call it terra former, they call this discipline star making, so he says he's a star maker and I have connected with him last year and when we both, Dan and myself started to think about working together on a project about crystals, I thought about Jenhan I said to Dan, well Jenhan knows a little bit about crystal technology and I had the opportunity to connect with him via Thor Han, so Jenhan is a student, he's in a sort of university in the Pleiades studying terraforming and Dan asked questions, a list of questions that are transmitted to Jenhan and he replied and our minds were totally amazed, because what Jenhan replied matched in all every point what Dr Marcel Vogel had discovered in his research and both were completing each other. So Dan explain to us please who Dr Marcel Vogel

Dr Marcel Vogel:

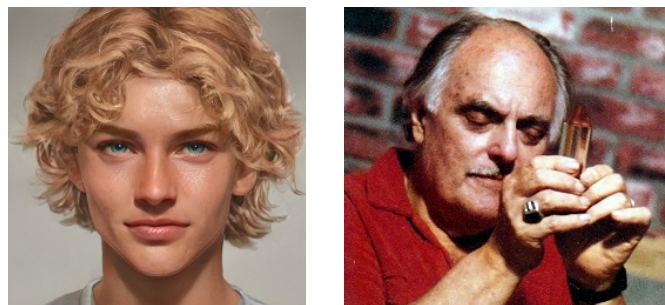

Dan:

Dr Marcel Vogel was IBM's senior head scientist for over 27 years. He was a prolific inventor with over 140 patents. He created the first magnetic coating used in computer hard drives. Created the red and blue phosphors for color television. Developed liquid crystal systems used into today's displays, and much more.

He was a pioneer in man/plant communications which led him into the research of the interface of consciousness with quartz crystals and water which he researched extensively for 17 years. After leaving IBM he set up a fully equipped laboratory to measure and quantify the science of crystals and developed a method to amplify and cohere the energies of mind by forming a quartz crystal in a di-pyramidal form known today as a "Vogel Cut" crystal. He trained dozens of medical doctors in using his developed technique utilizing the crystal with breath to alleviate various health issues in the higher energetic fields of the body and had great success. He was no doubt the first scientist of his caliber to pioneer the understanding of the energies of mind connected with the breath, quartz crystals, water and most importantly love.

He was also a close friend and research associate who I worked on projects with in the 1980s

Comparing corroborating information by Jenhan and Dr Marcel Vogel

The energy of thoughts are geometrical and can reshape the holographic grid of reality:

Jenhan:

Everything in the created universe is constructed on a geometrical holographic structure. "The energies of mind": I like that it is worded as such, because there is a difference between this and the electrical brainwaves. The energies of the mind are fractals of consciousness "solidified", in a way, or shall I say, that have taken form as a geometrical manifestation. A thought creates an electrical projection. An energy-thought reshapes the holographic geometrical formula of reality. It rearranges the micro-connections linking the fractal elements. Thought can reshape the holographic grid of reality because thoughts are complex geometrical patterns. The

crystal will bridge the new pattern to the existing ones, and if the impulse is strong enough, the new pattern will force themselves onto the old and the old will morph into the new.

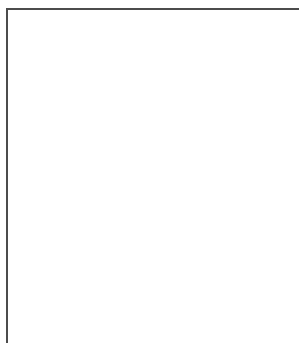

Dr Marcel Vogel:

The mind of man expresses his thought in geometric patterns these geometric patterns are identical to what we see in the crystallographic world, the geometry of mind and the geometry of crystallography are identical.

We have found also that when a thoughtform is released into space, two things happen. Thought is contained in a geometric pattern that forms in space, causing that space to oscillate. That oscillation, in turn, acts on matter that is in space.

The primary pattern of a thoughtform is held in the etheric body of an individual. It fits into a geometric form, much the same way as the energy of our minds fits into the geometric form and pattern of a crystal. It is my belief, from our studies, that there is a great similarity in the structure and symmetry between the energy body that surrounds an individual. When we think, we generate a pattern, and this pattern locks into space. It then oscillates and radiates a field that acts on matter. This is the energy that follows thought.

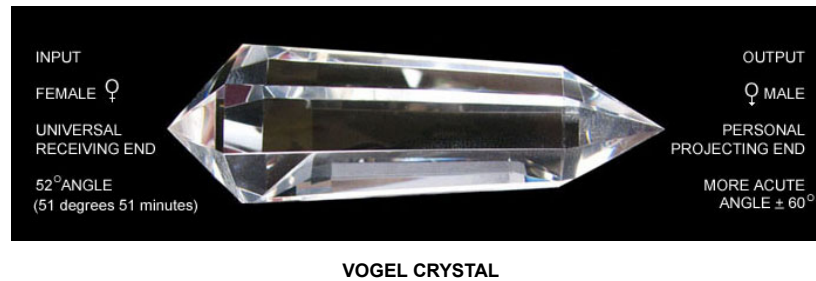

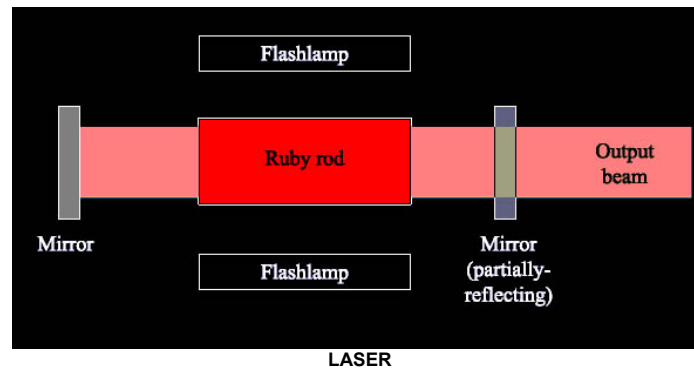

The crystal is a neutral object whose inner structure exhibits a state of perfection and balance. When it is cut to the proper form and when the human mind enters into relationship with its structural perfection, the crystal emits a vibration which extends and amplifies the power of the user's mind. Like a laser, it radiates energy in a coherent, highly concentrated form, and this energy may be transmitted into objects or people at will.

Dan Commentary:

Similar to how a laser functions, a quartz crystal cut in a di-pyramidal Vogel cut form acts to cohere the energies of mind, and as in a laser, it amplifies these energies

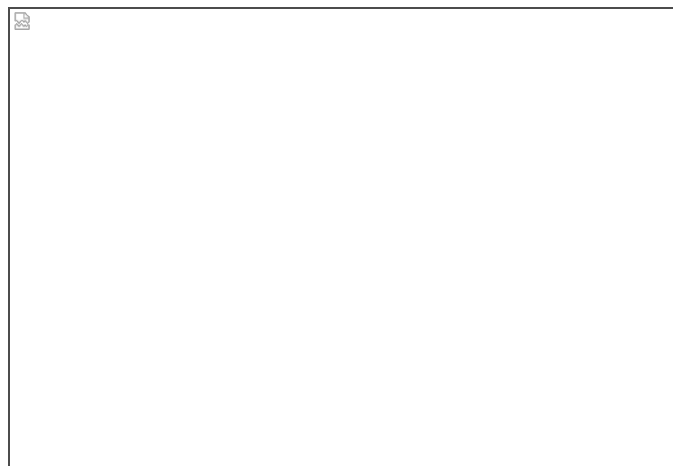

The energies of mind cohere through a Vogel crystal similar to a LASER

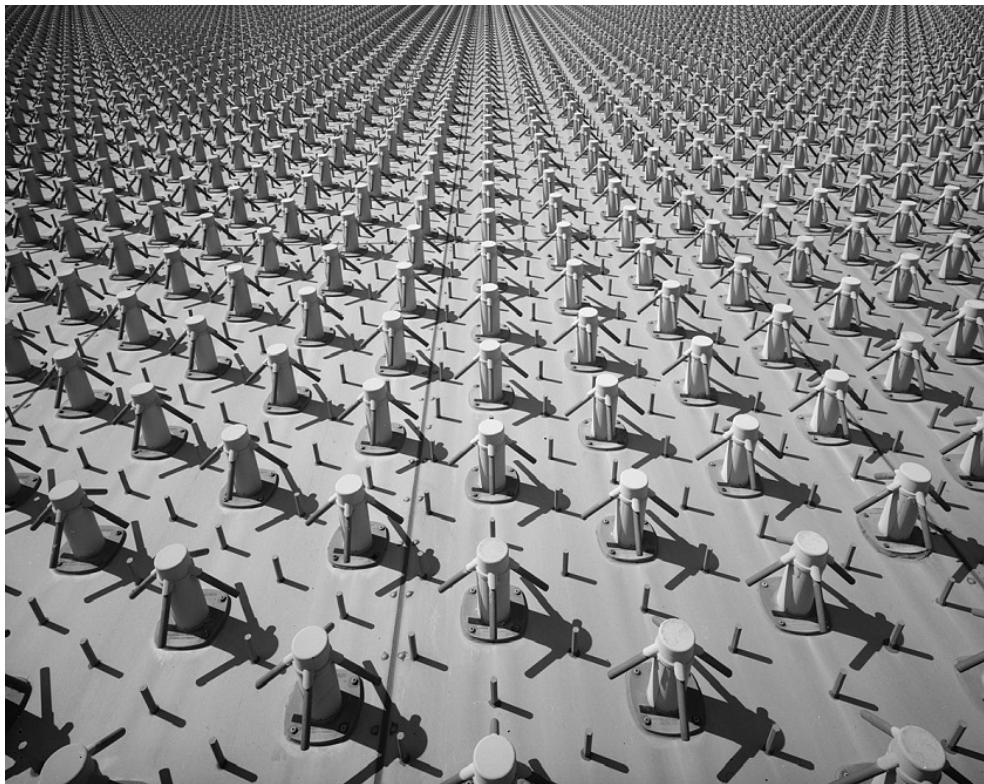

Dan Commentary:

This energies of mind through a crystal can also be transmitted into the planetary matrix. The crystals tetrahedral lattice amplifies the energies of mind. This is akin to how connecting a signal from a radio transmitter into a large phased antenna array that greatly multiplies the power of the signal.

A quartz crystal lattice structure

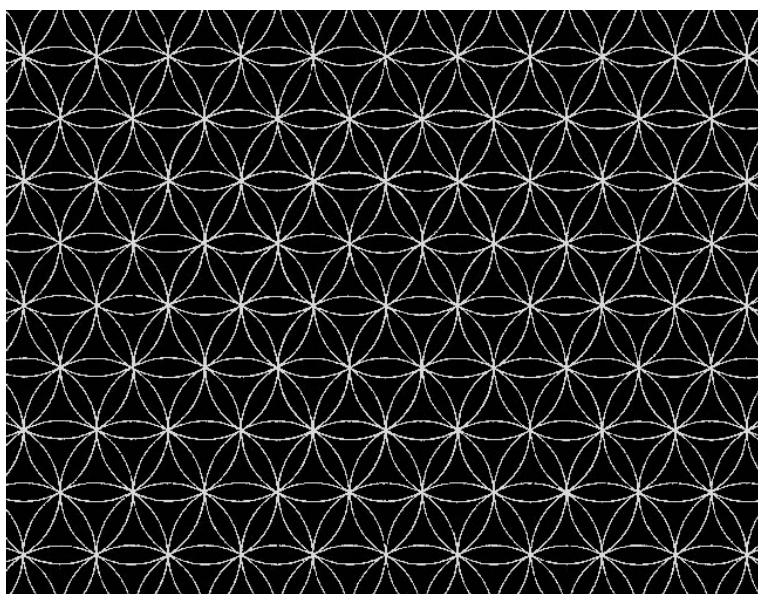

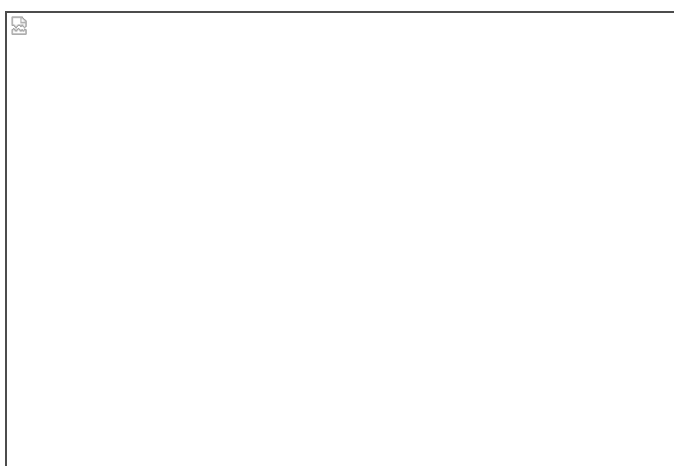

A phased array antenna akin to a crystal lattice multiplies the power of the signal

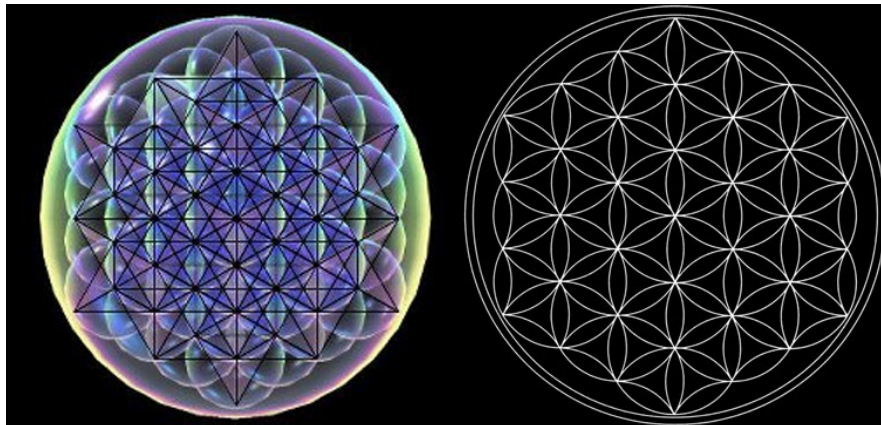

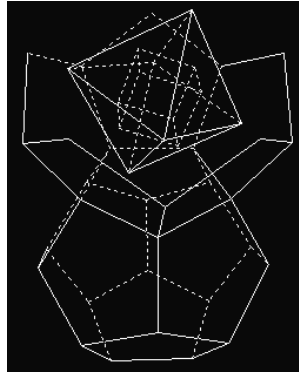

The core holographic structure of quartz crystal is the purest material in the universe:

Jenhan:

The core holographic structure of quartz, the purest material in the universe, is as I said based on the same core fractal formula than water, and both are interdimensional bridges. Tetrahedral geometry is one of the main frequency keys used to build worlds and life-forms. Tetrahedral fractal geometry is the secret of the universe.

Crystals exist in different densities at the same time. They are natural bridges:

Jenhan:

Love is not only a frequency. Your people will learn that frequency is a holographic geometry. There are three types of holographic geometry: atomic, energetic and photonic. These three arrangements create each, in their domain, a hologrammatic structure. All three generate a specific frequency that will resonate either through matter, energy or light. The reverse process is also active: when you generate a frequency, it creates a geometric pattern that imprints the ether. The geometrical frequency patterns that you just created alter -or create- a holographic structure of matter, energy or light. Now you need a bridge from ether to matter, energy or light, and can be technology or crystals. Crystals exist in different densities at the same time. They are natural bridges.

Earth's quartz crystals resonate with it's planetary matrix:

Jenhan:

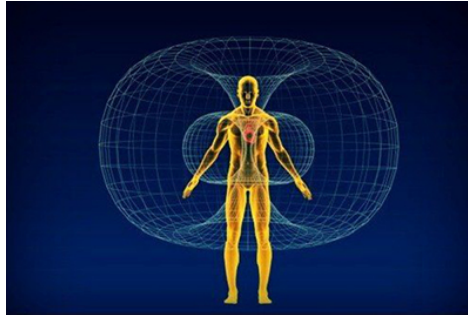

A quartz crystal, or any mineral is in resonance with the planetary matrix it is born from. When you bring your frequency-thought on the same resonance as the crystal, or any type of mineral, you attune also to its planetary matrix.

Quartz crystal creates a current in your body that can connect into the planetary matrix:

Jenhan:

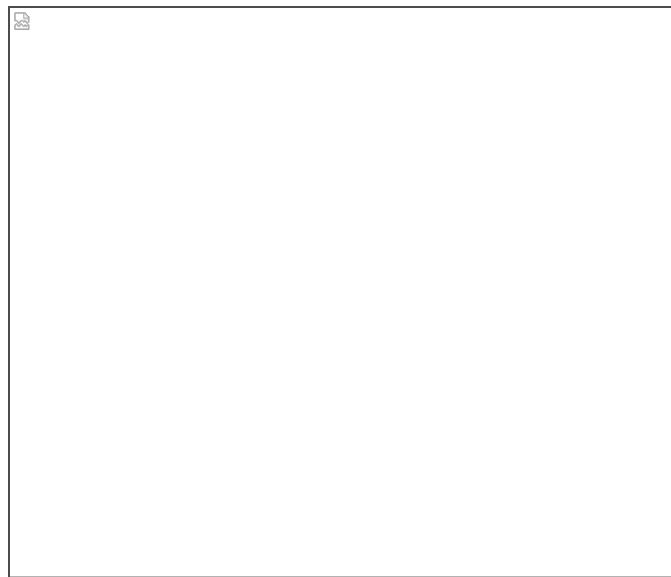

You take the mineral/ crystal in your two hands. It creates a current. Best is to have one in each hand but it works also with your two hands on one single crystal. Your hands must not touch. The current will work naturally. It is even better if you are in direct connection with the soil of the planetary matrix. You intend to make one with the planetary matrix. The crystal is the connector if you will. Quartz is best. Always works. Quartz is found throughout the whole universe. It is a fundamental component. You know you are in resonance when you feel it. It's like a shiver in your whole body, from your heart center. You may even hear the crystal singing the frequency of the planetary matrix.

When you plug into the morphic grid you are in connection with every living thing on the planetary matrix:

Jenhan:

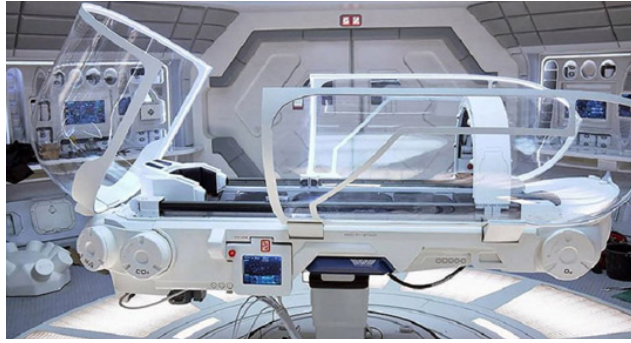

Imagine a mycelium veil wrapping around a planet, it interconnects everything because it carries information, constantly, simultaneously and towards all points on the web. Well, a morphic grid is a medium that does exactly the same thing. It is sentient, but not as you can comprehend it. It is conscious should I say. When you plug into it, you are in connection with every living thing on the planetary matrix, simultaneously. It is a non-organic consciousness constructed with frequency patterns in the shape of repetitive fractal geometry. There is one single mathematical formula for the whole of it.

Crystals can embed consciousness and be used to store fractal holographic patterns as used in med beds:

Jenhan:

Crystals can store data just as water does, because constructed on the same fractal core formula, but crystals have way more capacities. Of course, they are the most elaborate state of matter. So elaborate that it naturally embeds consciousness. To answer this question: some med-beds technology use fractal holographic technology. Let me explain. The fractal core formula of the tissue to repair is recorded, and the perfect unaltered geometrical pattern is reconstructed and superimposed on the damaged pattern. The old pattern instinctively pairs and morphs into the new one, because the universe tends to perfection. It is a holographic fractal re-pairing. Sound frequency is used to “tie in” the new pattern to the old one. You remember how I explained earlier, that holographic structures are constructed or either altered by frequency?

Dr Marcel Vogel:

The energy of the mind is focused in space and has the capacity to expand the crystal lattice system in which it is projected and released with intention. The beauty of this concept and activity, is that this information is locked in and stored with the crystal in much the same manner as one stores a magnetic domain on ferromagnetic surfaces, i.e. recording tape or magnetic recording discs.

In this way, you can focus your intention on the crystal, you can then extract the data, amplify the pulse, or release it as a projected burst of etheric plasma. This set of statements is the key, the heart, of the evolving technology of the use of crystals and crystal devices in Transformational Healing.

In our laboratory experiments, we have found that thought releases an energy which we can store in the lattice of a cut quartz crystal. These patterns of vibrations are stored and oscillate like a magnetic domain field.

We have seen in our laboratory the transfer of the energy of thought into a quartz crystal. We can retain this energy in exactly the same way that we store information on the ferro-magnetic material.

Quartz crystals will store the geometric pattern of thought in much the same way.

As we think, we produce patterns. These patterns are omnipresent. They transcend the electromagnetic spectrum. By their presence they act on matter. Matter is then moved to action, much as we experience sound and light.

Dan Commentary:

Know that our mind is continually projecting holographic patterns according to our belief and we are recreating ourselves every instant

Breath carries information from your soul:

Jenhan:

Breath carries memories and thoughts, it also carries the energy of a being, not only the encoding of its vehicle DNA but as well the encoding of the soul. When you project breath, you also project by superimposing, a parcel of the soul/being. Hence a fragment of one's consciousness.

Power of the pulsed breath:

Jenhan:

Short precise, surgical, powerful breaths are better than a long one. In a long one, the energy/intention gets absorbed by the Ether. In short quick breaths, the energy/intention keeps intact and doesn't lose intensity. I recommend short quick breaths, think about "precise surgical". Intention is like a needle: sharp and targeted very precisely to be able to penetrate matter.

Dr Marcel Vogel:

To be a healer, the science of breath is essential. Ancient wisdom and yoga can help move a person through the various levels of consciousness.

As we breathe, we bring in a volume of air and it spins as it goes down the trachea filling our lungs with this air. As we hold that air in our lungs, a vibration, an oscillation takes place. In other words, the patterns of thought that are stored in space by the act of thinking are drawn into our body by the breath process into the bloodstream with the information codes of our breath.

We charge our body with breath; we structure our subtle body with a chargeless energetic mass: prana. With these two energies, breath and prana, we have the essential set of forces necessary for the creation of a thought form.

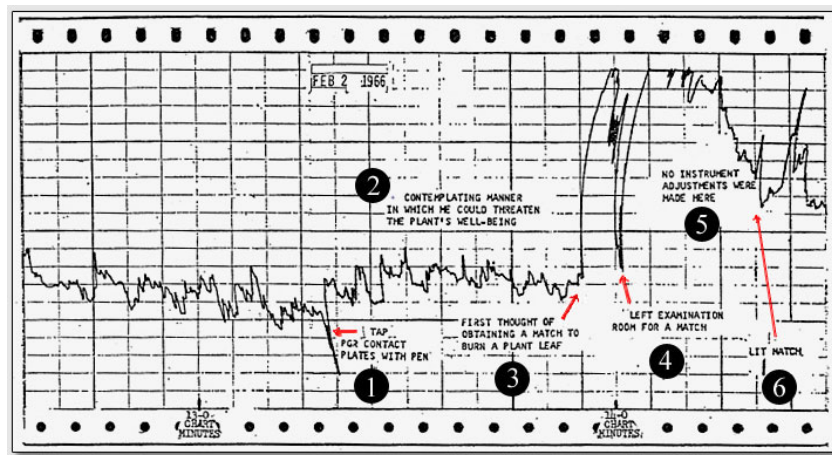

We hold a crystal in our hand, draw in our breath, focus our mind into the crystal, and suddenly release the breath through the nostrils with intention to link. A charge transfer takes place. We occupy the space between the lattice system of the quartz crystal.

Dan Commentary:

Breath is not only bringing in air into our lungs, it is indeed connected with a multi-dimensional transfer of information as we inhale and exhale.

Elena Commentary:

This technique is used in Shamanic work for soul retrievals. The Shaman brings back from his journey the scattered pieces of the patient's consciousness and blows the pieces back into the patient's body, throughout specific chakras, by short powerful breaths. Another testimony brought by ancient Shamanic traditions that breath can be the physical vessel for consciousness, and that breath can also penetrate solid matter such as a human body, a gemstone or a crystal.

Clearing the crystal before use:

Jenhan:

The energy force that is a living manifestation of Source is being impregnated inside the crystal but beware, the crystal must be empty. This means: no residual emotional imprint, parasiting or charge. The crystal must be pure and clear from any form of energy, or consciousness even. I wouldn't say that at this stage, the crystal is really "empty", because it carries its frequency imprint, but I mean empty from anything that is not the original frequency signature of the crystal. In order to perform this action: embedding a fractal of your consciousness in a dynamic projection, into the crystal, the receptacle must be pristine pure. There are methods of purification I can tell about, the best is to run the crystal through a sound scan. You need instruments that create a high frequency sound, or trained persons can clear a crystal with their own consciousness. These individuals have reached a clear state of mind.

Dr Marcel Vogel:

What we have found is that both the vibration in the water and in the crystal can be erased by a bulk eraser for magnetic tape or by a focused thought the pulling in of breath and the sudden release of breath.

Dan Commentary:

Marcel was able to measure this with a spectrophotometer by seeing the programmed patterns from mind imprinted into a vial of water being completely cleared by also using mind with the intention to clear using the pulsed breath.

Elena Commentary:

I noticed that a crystal that has been cleaned and emptied from any superfluous charge, weights lighter.

Quartz crystals, water and love all interface naturally based on the tetrahedral geometrical core fractal pattern:

Jenhan:

Water, by its natural core structure, is a universal connecting medium. Love is of a more complex holographic structure, but from the same fractal core pattern -fractal formula- as water. Crystal is a derivative geometrical pattern from water and love, but built on the same core formula. This is why all interface naturally.

Dr Marcel Vogel:

The remarkable thing is all of the crystallographic forms that we have in nature now, and there are seven major classes can be formed in water itself, I repeat this statement carefully to you, water in the process of crystallization into ice will exhibit all of the patterns of the crystallographic world around us, it is the personification in a single bit of matter of all that is, it's a very very profound and meaningful statement.

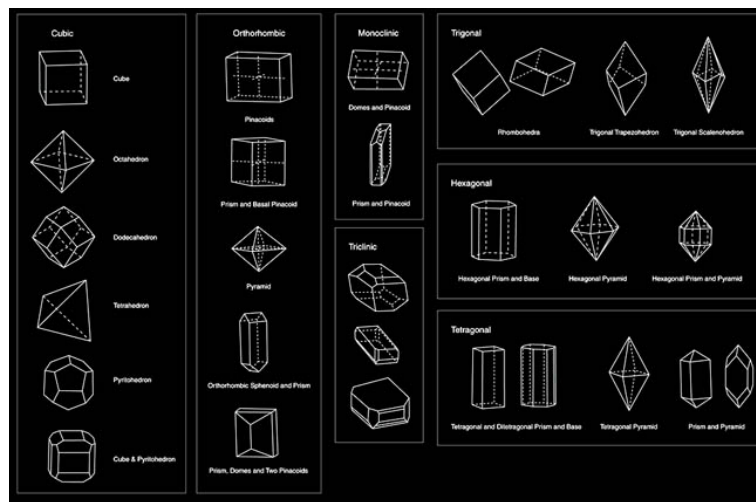

They have discovered this in the ice in both Antarctica and the Arctic by drilling cores hundreds of thousands of feet and pulling these core samples out and carefully pulling micro plugs under refrigeration of the ice and they

find under the microscope all of the patterns of crystallographic forms that we have in nature.

What we have found in our laboratory is that the energy of mind projected through a crystal will structure water just like it was frozen into ice, the remarkable and unique differentiation is that that water when it is structured the way I am talking to you now, with mind and with thought, remains fluid that's structured, that type of category is called a liquid crystal.

Dan Commentary:

The elements of Water like Quartz are both universally resonate to all geometries within this holographic matrix. This is why in water all geometries can be formed in ice and why the entire frequency spectrum of light can pass through a quartz crystal.

All the major crystallographic forms can form in water

The reason why love can resonate at the high densities, whereas dissonant energies can not:

Jenhan:

Dissonance cannot attune with an ordered state of geometrical resonance.

Dan Commentary:

The famous water researcher Dr Masaru Emoto, confirms Jenhan's statement in saying...

"Water is attempting to communicate something to us. Negative emotions prevent the water from crystallizing. While positive emotions allow it to develop into beautiful hexagonal shapes."

Dr Marcel Vogel:

We speak of vital water, we speak of holy water, we speak of water from Lourdes France, we speak of the sacred springs, each one of these statements I find to be true. When I have studied waters from various sacred locale I find a structure in that water which is unique from the bulk water.

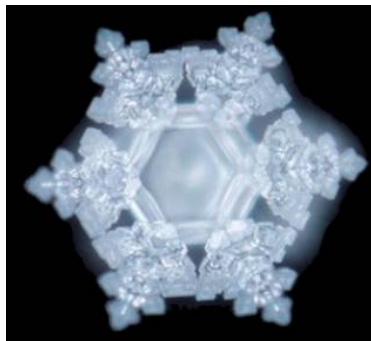

I got a sample of water from a sacred spring in Hungary and it exhibits an energy level that transcends anything I have seen anywhere, I get a little tiny vial, I take a drop of that water and put it in my reverse osmosis bulk water and that water immediately has that charge which was in the original vial.

Dan Commentary:

A drop of water from a sacred spring contains a highly ordered state of geometrical resonance within it's structure. As Jenhan stated that "Dissonance cannot attune with an ordered state of geometrical resonance"

Therefore in the opposite situation, where a single drop of unordered unstructured bulk water that is in dissonance to the geometrical resonance, is put into a container of highly structured water, there will be no effect on the structured water because that drop is in dissonance and cannot affect the highly ordered structured water. Instead, that drop will be transformed by replicating or mirroring that high order of structure that is in the water that surrounds it.

This could be likened to how each of us are a fractal drop of consciousness in an ocean of a larger collective consciousness, and that each one of us can greatly affect that larger ocean with higher levels of consciousness versus lower levels, and the reason why the high frequency of love can resonate and have a greater effect into the higher densities that connects to the entire ocean of consciousness, whereas dissonant energies can not.

The frequency of love with a visualization acts as a universal bridge into the holographic matrix:

Jenhan:

The frequency of love is the connecting pulse between all living things in the universe. Even through dimensional planes. Love is the universal bridge. It can bridge anything, I mean a-ny-thing, love is the tool. So when you intend love into a crystal, you activate its transcending capacity. When on the top of this action you embed a

target by visualization, it bridges you to it easily. Love is a secure channel, because of the high frequency. It prevents dissonance. The target can be: a visualization inside the crystal of a place or a person, you can also embed a story by moving images or/and vocalization of the story, and you can either, also, embed just a sound: the name of a person or of a place. The more you superimpose layers, the better it is going to work. Repeat for the geometrical resonance. It will force the pattern into the holographic matrix.

Dr Marcel Vogel:

"Our primary responsibility is to love." "Love is the universal code, known by all nature, which brings order, symmetry, and balance...to its actions and service." "I think that love ...is one of the most necessary measurable units that we have on this earth plane." "Love is the glue of the universe and helps keep matter in form. When I love you, I empower you to bring yourself into a state of wholeness." "I, as a healer, only try to assist you to come to self-awareness. I just give you one thing - love."

In doing therapeutic work with the crystals, we must be cognizant that we are providing a loving field. This field can be nullified by the act of a doubtful thought. All effects will come to a halt. It is the operator's belief in him or herself, the knowledge and assurance of what they are doing, that brings about this form of therapy.

Working in a loving way with crystals facilitates the transfer of this charge, generated by mind. In this way it is totally harmless. The crystal will amplify the weak field we first generate. As we release this field with intention and breath, the field moves like a laser into the energy, or subtle body, of the recipient.

When we think precisely, thinking in accordance with the well-being of an individual, that thought locks into the pattern of that person and starts the process of integrating the fields that we generate so that we become more and more of a cohesive, integrated, functioning individual. This says that we become one with ourselves. In this process of developing at-one-ment, we build the capacity, the energetics to move to a higher level of consciousness so that the love of God, the Divine Mind, can flow in and through our own body.

In the work we are doing in the laboratory, we are striving to measure this force in water. It is our continuing effort to understand what these forces are and how they operate in nature. We are doing this by observing the structuring of water. This is accomplished by charging a crystal with thought and love, transferring this charge by a resonance process from the crystal to water which is being spun around the crystal in a clockwise direction. We complete this process by studying the water for change in pH, conductivity, and its ultra violet spectra changes.

Dan Commentary:

This charge transfer from the crystal with the frequency of love and the mind's intention is amplified and moves coherently like a laser into the recipient. This recipient could be the planetary matrix.

In regards to spinning the water around a crystal. Marcel was able to convert thousands of gallons of an inferior wine into a California award winning wine by transferring into the crystal the structure pattern of an award winning wine which was then transferred into the inferior wine spun around the crystal.

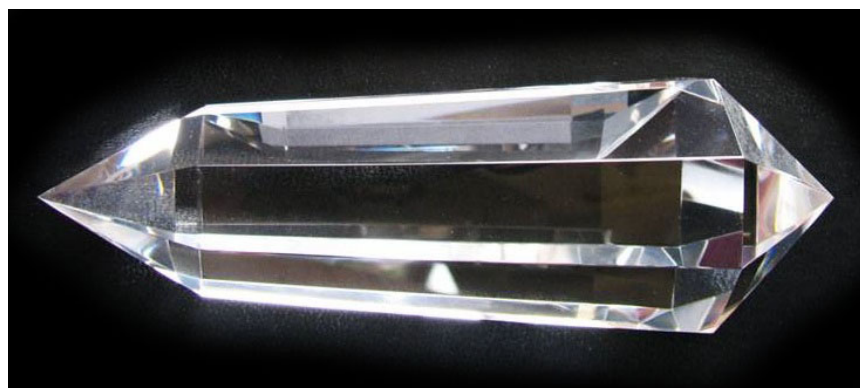

Crystal lattice structure alignment is important and is enhanced with a Vogel cut crystal:

Jenhan:

Crystals have their own fractal geometry. If they are in their natural original shape they have it active naturally. If

they are cut roughly they lose it, but if cut following the lattice structure they keep it, and can even be enhanced considerably that way. Thor Han tells me that you know what type of crystals correspond to what I say. (*Thor Han confirmed Elena's response that they are Vogel cut crystals.*)

The 52 degree angle of quartz crystal and the Great Pyramid acts as a transponder in the holographic structure of the matrix:

Jenhan:

This is a ratio that acts as a transponder. It is dynamic geometry. Some shapes, just because of their proportions, naturally affect the holographic structure of the matrix. We use this specific pyramidal ratio to build our Phryll (*aka Vril, Chi, Prana*) generators. Because the geometrical structure of the central crystal, in a generator, will interface with the pyramidal ratio of the building or the machine harvesting its energy.

Dr Marcel Vogel:

The large end of the Vogel crystal is cut to the same internal angle as the Great Pyramid of Cheops, 52 degrees, also measured as 51 degrees, 51 minutes or 51.84 degrees. The large, female, end draws in Prana (*aka Phryll, Vril, Chi and life force*), which travels down the length of the crystal, being amplified each time it is reflected by a facet. This highly amplified Prana flows through the male end of the crystal where it is focused into a coherent, laser-like energy. Thus, the more facets the more amplification.

Most of the internal angles of water and quartz are either fractions of this 52 degree angle or multiples of it. The fundamental geometrical pattern of quartz and water is the tetrahedron. Water molecules, bound together, form tetrahedrons in tilted or puckered rings. The common bending angle of water is 26 degrees. This is where the intermolecular bond is the strongest and it happens to be half of the interlattice 52 degree angle of quartz.

The interlattice angle of a crystal is related to the basal angle. The basal angle is $\frac{1}{2}$ of the angle of the tip of the crystal. The interlattice angle of quartz is 90 degrees minus the basal angle which is 38 degrees. Therefore the interlattice angle is 52 degrees. This is also important to note, the angle of the Cheops pyramid.

The intermolecular bonding angle for the water molecule is 104.5 degrees. This is the angle that exists between the hydrogen atoms of each water molecule. It is virtually double that of the 52 degree interlattice angle for quartz.

It is possible that there is a compatible harmonic between water and quartz because of the similarity of these angles. This would allow a resonant transfer of the energies that are imputed to the crystal to a significant group of water molecules in any given sample. The structure of quartz can replicate itself in water because of this resonant transfer based upon structure.

The geometric structure produces frequency patterns, harmonics, that can transfer from quartz crystal into water. Very small amounts of energy are required for this transfer.

Dan Commentary:

Research has shown that everything in the universe can be individually attuned to energetically by a given geometrical angle. These angular geometric frequencies have a quality that is akin to how electromagnetic

frequencies have both higher and sub harmonic multiples of a given frequency, in which energy and information can be transferred via these harmonics. For example a signal of 10MHz would have a sub harmonic at 5MHz which is half and a 2nd harmonic at 20MHz which is double the original signal.

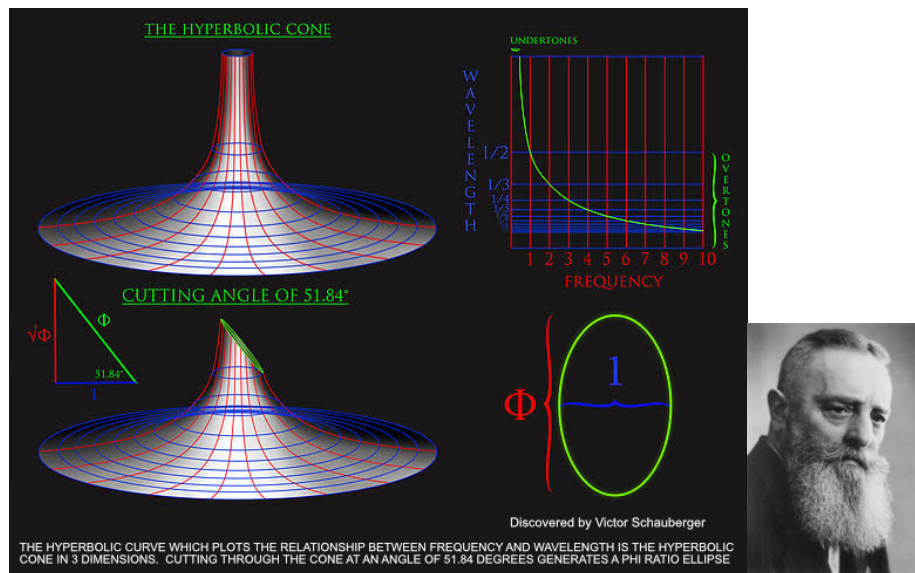

Water has molecular angles at 26 and 104.5 degrees, which is half and double the 52 degree angle of quartz crystal and therefore you could say they angularly harmonically interface with the 52 degree angle. The relationship to the 52 degree angle of quartz, like the Cheops pyramid, is related to the value of Phi 1.618 which its value resonates fractally into infinity within the structure of the holographic matrix. So this supports what Jenhan said, that this angle acts as a "transponder" to interface with these energies of the matrix for their Phryll generators. This could be termed angular harmonic resonance.

The 52 degree cutting angle of Victor Schaubberger's Hyperbolic Cone which represents the curvature of spacetime yields a "Golden Egg" of Phi proportions. Showing again the relationship of the 52 degree angle and the infinite ratio of Phi in the calculations of spacetime curvature.

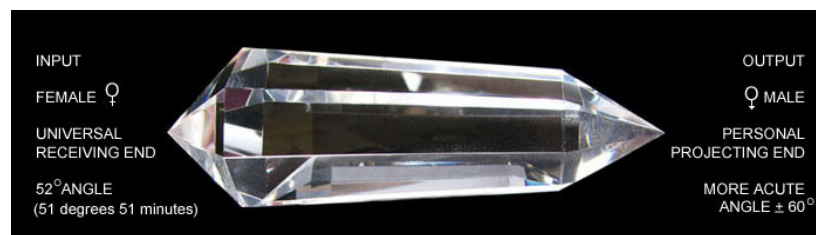

Elena Commentary:

We have now the detailed explanation of why the Phryll generators I have had the privilege to see are contained within a perfect pyramid, as its perfectly built geometry contains and amplifies the harvested energy. The spiraling energy throughout a crystal is also amplified by the 2 "electrode" metallic coils around it.

52 degree (51.84) cutting angle of Victor Schaubberger's Hyperbolic Cone representing the curvature of spacetime yields a "Golden Egg" of Phi proportions

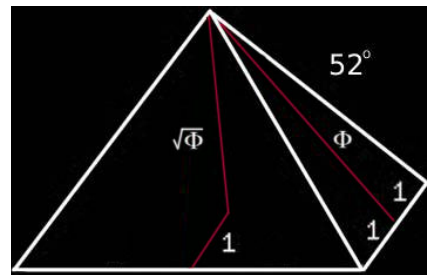

The Universal or Female end of a Vogel cut crystal is set at 52 degrees

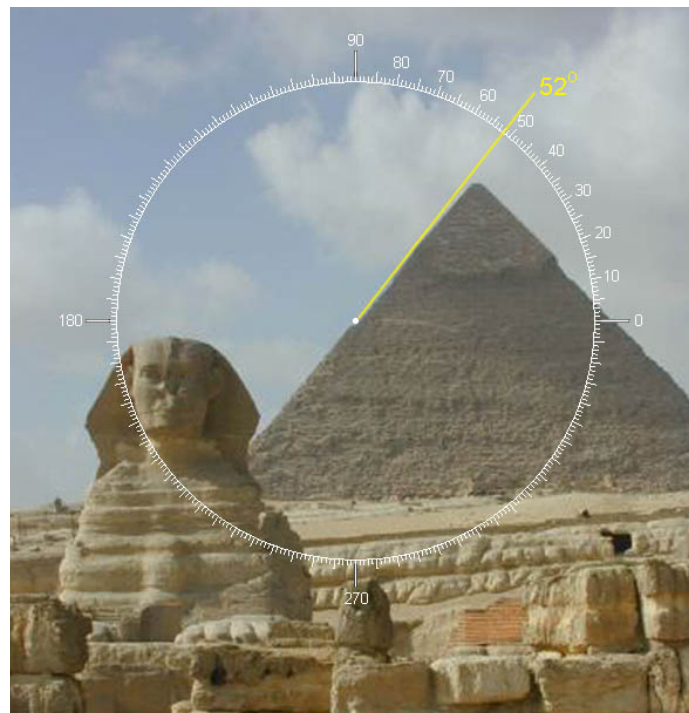

A properly cut Vogel crystal has the tips aligned with the "C" Axis or growth axis of the crystal

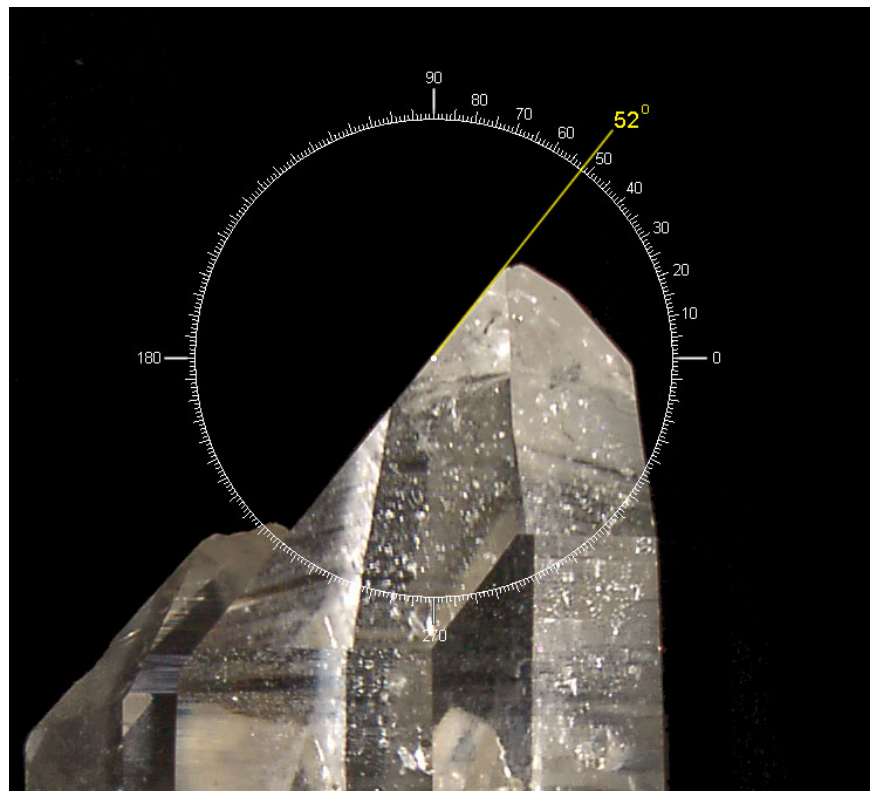

The energy of the crystal spirals from one tip to the other

52 degree angle of the Great Pyramid and Phi

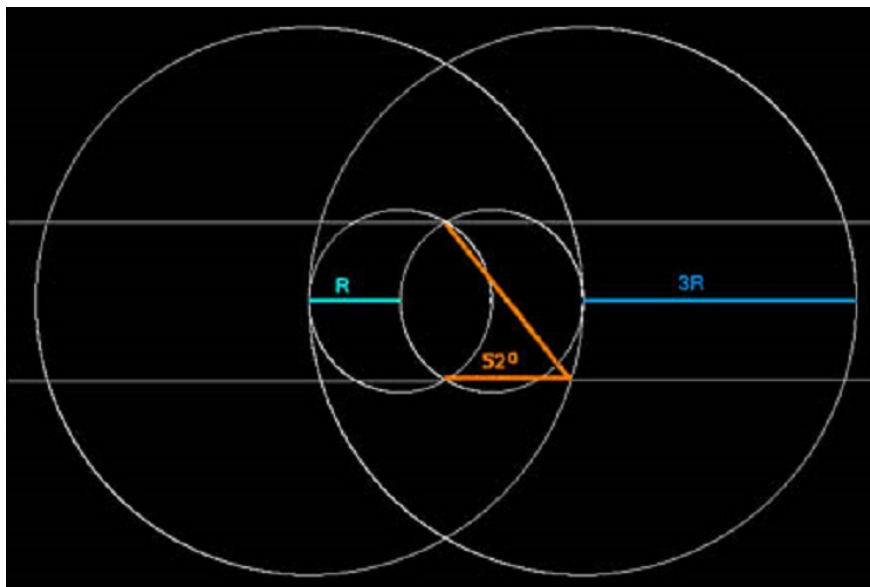

The Great Pyramid

Quartz Crystal

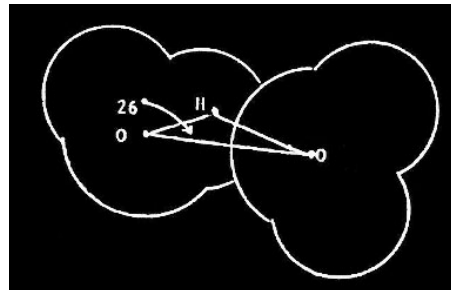

Geometrically the 52 degree angle is revealed in the following relationship of the vesica piscis

52 degree angular harmonic resonance between Quartz and Water

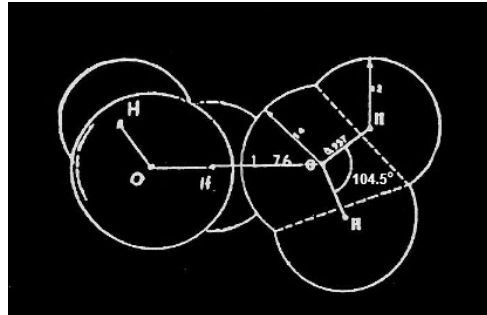

$$2 \times 26 = 52 \text{ degrees}$$

The common bending angle for water molecule is commonly 26 degrees ($26 \times 2 = 52$)

$$1/2 \text{ of } 104.5 = 52.25 \text{ degrees}$$

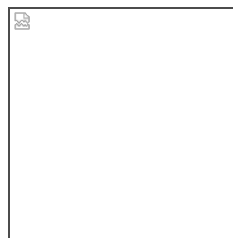

The intramolecular bonding angle for the water molecule is 104.5 degrees

Focus your thought into the node center between the tetrahedral/hexagonal geometry of the opposite polarities which is the vortex singularity point within the crystal:

Jenhan:

It works by finding the phase-conjugation node inside the crystal, by projecting inwards the geometrical shapes of the two opposite points, like a mirror. There, is the vortex singularity of the crystal. Focus your thought and energy just there, and you may project your consciousness to anywhere you wish in this universe, and the other universes. To other densities, other dimensions. Anything is accessible in space, dimension and time. This is great power, Elena. It is a very important information. I am honored to be allowed to share this with you.

Physical pressure on the crystal can open the central node vortex which can be powerful:

Jenhan:

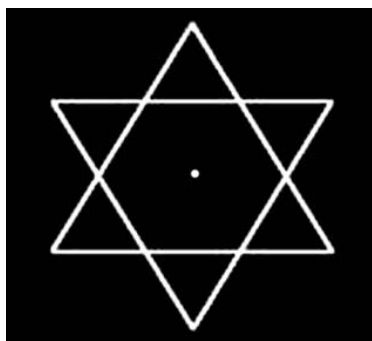

There is a very precise, specific pressure that you can apply to quartz, that will activate the compression node and open the vortex. The energy produced can be tremendous. This kind of operation must be conducted knowledgeably and wisely.

Dr Marcel Vogel:

To charge your crystal, hold it in your dominant hand and roll or rotate it clockwise while at the same time squeezing each of the facets of the body of the crystal. In a short time the surface of the crystal will begin to feel somewhat sticky and a squeaking sound may be heard. This indicates that a superficial piezo-electric primary charge has been built up on the surface of the crystal.

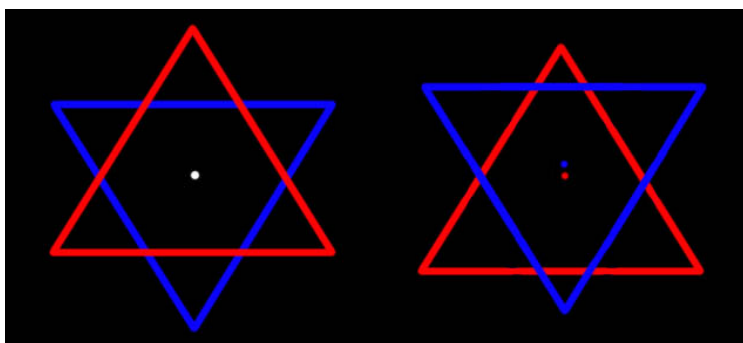

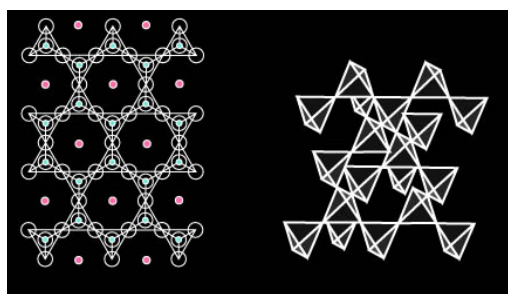

Dan Commentary:

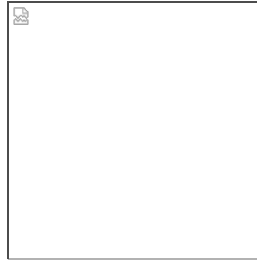

Pythagoras called the symbol of two interlacing triangles forming a 6 pointed star with a dot in the center "The Star of Creation" That dot in the center being the central creative point of balance between the two opposite polarity triangles. This is what the lattice structure of a quartz crystal is like.

When there is no physical pressure applied on the crystal, the centers of charge for the two opposite polar triads are aligned exactly in the center and they are at a zero point potential and neutralize each other out. When there is a slight physical pressure applied, it displaces the lattice network of trillions of opposite triads, their charge centers now have developed a collective potential difference which can be measured in voltage across the crystal. This is the piezo-electric effect.

This hexagonal/tetrahedral crystal geometry creates a vortexial spin that causes the crystal formation to grow in either a right or left handed spiral.

The Piezoelectric Effect

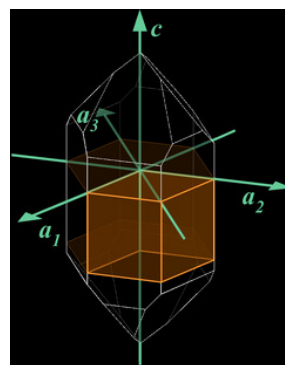

The location and activation of the singularity within the eye of the vortex center within the crystal

Jenhan:

It is not male and female as biological terms but active and receptive. The two dynamics twirling in opposite directions create a phase conjugated tension that creates singularity in the hologram. A convergence of infinite power.

The singularity is in the vortical center, not metric center. The two triads are not equidistant from the singularity nor symmetric either; because their ratio, and their distance from the epicenter, are determined by the different angles of inclination of the two points. It is not a physical node but an infinite singularity, which is different.

The pressure must be performed perpendicularly to the structure of the lattice.

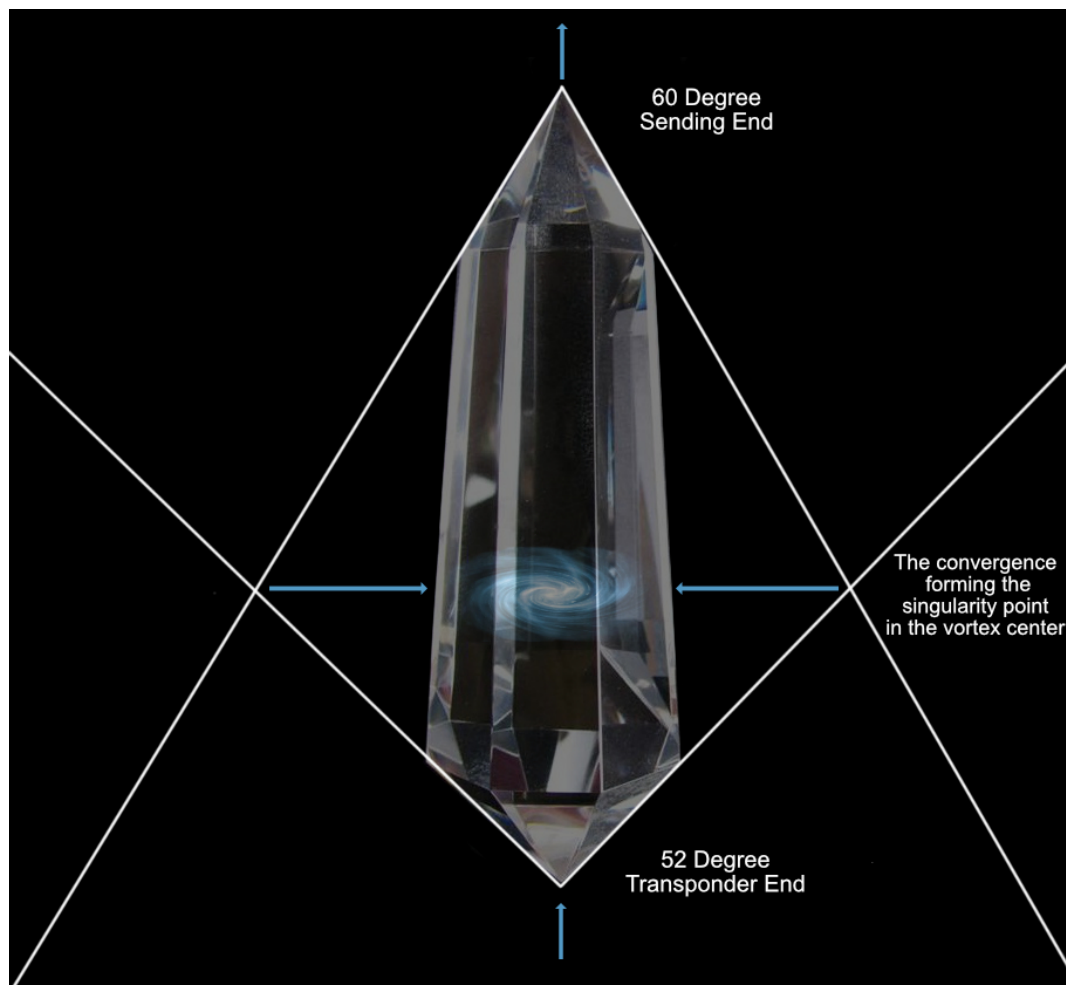

The singularity is where is encoded information in the crystal.

This is what you want to compress for piezoelectric effect. Two applications:

Do you remember, it is like breath: no slow long pressure, but a series of sharp, strong pulses. If you apply constant long pressure, it will accumulate charge and become a generator. If you apply sharp quick pressures, it will stimulate the singularity and pierce through the hologram, you can then use the crystal as a tool to modify the hologram. You will “feel” the appropriate rhythm of pulsation.

You can also feel it with your mind, where the power center is. Your being recognizes it. It pulses faster than light, your body and being recognize this. They feel it.

The EYE of the Crystal

The dynamics of the two vortexes are based on the angles of inclination of the two crystal ends converging to meet which creates a singularity point.
This is the power center in the vortexial eye created by the merger of these two opposite spinning vortexes.

6) Imagining a positive timeline on earth

Imagine that...

A new beautiful world is now realized on planet Earth

All of the dark criminal elements that have done crimes against humanity have been identified and brought to justice, where they can no longer detrimentally affect the billions of lives on Earth ever again

Across the planet there is great joy and celebration for the liberation of Earth from these dark forces

The hidden suppressed technologies of the secret space program are now no longer secret and are being put to use benefiting all of humanity

All human trafficking and slave operations have been dismantled throughout our solar system

The deceptive centralized control of information by the mainstream media has been completely shutdown, as well as their control of social media on the internet and are now public utilities in service to the people without a controlling agenda

Open contact with advanced off planet cultures allows the people of Earth the benefit from the knowledge and wisdom of cultures thousands of years in evolution

Our education system with the assistance of advanced cultures gives children the opportunity to reach their highest potential in understanding science and the Earth's true history

The corrupt medical and pharmaceutical corporations that operate for profit are totally replaced with the release of the advanced holographic medical technologies, alleviating all suffering from sickness and disease

Life spans can now be realized into the hundreds of years

Overpopulation is not a concern with remote areas now able to be inhabitable as well as off planet locations

All obsolete and dangerous technologies of nuclear, oil and coal have been replaced with clean zero point energy systems

Replicator systems can now create anything to be formed out of the matrix

The basic necessities of water, food and shelter are now available to everyone

A new Quantum Financial System replaces our easily corruptible monetary system

A new Quantum Communication system utilizing the principles of quantum entanglement replaces the distance limited and biologically harmful electromagnetic communication systems

A new Quantum Internet allows practically instantaneous secure access to greater data from any location

Anti-gravity systems replace all transportation systems

The oceans are cleared of radiation and toxic to life waste

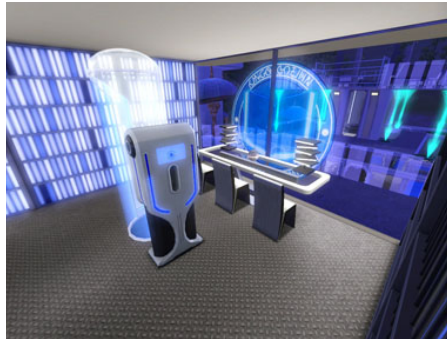

Weather engineering is no longer used as a warfare tool

Our planet is now being renewed with technology that works in harmony with nature

Humanity now directs it's attention to spiritually evolving rather than simply surviving

Children now studying through a vast library depository of knowledge, are looking back through history at the tremendous challenges that the people of Earth faced

that has brought them to today's world. They vowed to never allow this to ever happen again to their beloved planet and are filled with gratitude to all those who contributed in the past to the beautiful new world they now experience.

7) Using a crystal to imprint a positive timeline into our planetary matrix

Elena:

We are now going to get into action and perform some real magic. Now that you have learned all these amazing things about crystals, and about their power to affect the planetary matrix, now that you have implanted into your mind a positive timeline for our future, we are inviting you on a journey together. Through a meditation, using your own crystal, we will teach you how to concretely make a change, for real, physically, using the power of the mind and crystal, a secret that has been hidden from us for a long time. Let us collectively co-create and imprint into our crystals a vision of the most wonderful and positive timeline, for the greater good of all the beings of Terra.

Manifesting our reality using a crystal

Build up the energy in your body by deeply breathing in the pranic energy

Now clear your crystal of any previous programs using your intention with pulsed
breath

Connect to your crystal by activating it to become one with it

Build up a charge within your crystal by rotating it in your hand while rubbing the
facets with a slight pressure

With your love for the planet and all living beings, fully imagine the most benevolent
timeline outcome here on planet Earth in your mind's eye and feel it in your heart as
though it already is our current reality

Now take in a full deep breath holding that vision

When you are ready, release your breath as a rapid pulse through your nostrils
with your mind projecting that vision into the crystal
while at the same time physically give a sharp squeeze of pressure on the crystal!

Know that it is sent through the planetary matrix and that the program is now written

Be grateful and know that it is so!

8) Concluding thoughts

Practicing this positive timeline visualization on a daily basis will help to anchor this image into the holographic
planetary matrix.

You can use for example, either an inexpensive \$13 single point of quartz crystal, or for an enhanced effect using
the design Marcel created and that was confirmed by Jenhan to be effective, there are various options, such as
relatively inexpensive "Vogel Inspired" crystals (such as a \$140 6-sided). For actual "Vogel cut" crystals they are
more expensive. The difference is explained here. That choice is up to you. So long as it is quartz, it will work.

Watch Marcel's videos on [MarcelVogel.org](https://marcelvogel.org) for further information on using the crystal plus other listed sources.

Elena Danaan's youtube channel for the latest information from the Galactic Federation of Worlds of which she is an emissary in communication with her contact Thor Han Eredyon.

Thank you for participating in co-creating our beautiful new positive timeline on planet Terra!

Ongoing crystal technology research with Jenhan Eredyon
